

# Q20290 Risk Management Professional (PMI-RMP®) Certification Preparation Course

Duration: 3 days LIVE Online

## Course Overview

This course will only be run as a face to face in-class event when it is confirmed safe to do so.

The Project Management Institute (PMI®) recognises the importance and special qualifications needed to be a project risk management professional. The PMI-RMP® credential will substantiate the applicant's knowledge, skills, and experience in this area, and this PMI-RMP® preparation course will help in preparing to take and pass the RMP® certification exam. Ideal for any project manager or anyone involved in project or programme risk management.

## Who should attend?

- Professionals who spend a majority of their time managing project risk for a project management plan
- Professionals who are working as project managers or key project or program team members
- Those who want to get a recognised Project Management qualification and who recognise project / risk management as a core part of their professional experience

## Prerequisites & pre-reading guidelines

There are no specific prerequisites for this course. However experience in projects which include or allow exposure to risk management is recommended.

## How certification is earned

This certification is offered through the Project Management Institute (PMI) as an e-proctored exam. Registration for the exam is managed via your course instructor/coach. Our RMP® Coach will be in contact to assist and support as you prepare for the exam. You will be provided with a study guide and access to over 300 RMP® sample questions. As your final weeks of preparation are underway, our RMP® Coach will be there to assist you.

## Course Objectives

On completion of this course, attendees will have a:

- Comprehensive understanding of the RMP® certification requirements and testable materials
- Comprehensive review of the various processes, knowledge areas, formulas, terms and individual process steps for project risk management
- Understand how to monitor and communicate project risk on a timely basis
- Focus on risk monitoring and control
- Understand the communication principles behind risk and issues management
- Be able to manage stakeholder involvement with risk
- Being prepared for RMP® certification resulting in greater risk management confidence and credibility

## Context

The PMI-RMP® credential will substantiate the applicant's knowledge, skills, and experience in this area of Risk Management, and the PMI-RMP® preparation course will help in preparing to take and pass the RMP® certification exam. Ideal for any project manager or anyone involved in project or programme risk management.
