

## Q31281 Disciplined Agile Scrum Master (DASM)

Duration: 2 days LIVE online

### Course Overview

The Disciplined Agile Scrum Master course is an opportunity for teams new to Agile projects and environments to gain an understanding of Agile and Disciplined Agile.

### Who should attend?

This is a course that is beneficial for those who are new or have just entered the world of Agile and Disciplined Agile Methods. It may be of particular benefit to those who have multiple years of management experience and are looking to embrace a method of agile continuous delivery. This is a course that can be customised to reflect the experiences and levels of participants.

### Prerequisites & pre-reading guidelines

There are no prerequisites for this course. However, some familiarity with Agile Development would be useful.

### How certification is earned

On completion of the course, you will be eligible to go forward to take the DASM Certification offered through Project Management Institute (PMI). It is a non-proctored open book exam.

### Course Objectives

On completion of this course, attendees will have an understanding of:

- The values, principles, and practices of what it means to work in an agile and lean way
- How to deliver value in increments using an iterative way of working
- How to translate traditional requirements to a more lightweight user story format, and how to estimate them
- The purpose the agile work board serves, and how it helps you build transparency and trust inside your organisation
- How continuous flow and lean differs from an iterative way of working, and when and how it is a better fit
- The value of limiting work in progress and strategies to minimise waste and optimise the whole system

### Context

The Disciplined Agile course will look at Ways of Working (WoW) and how teams can embrace this using Disciplined agile Methods. You will learn about Agile and Agile ceremonies, the work board, Agile team roles and user stories including estimation using story points. From the basic Agile practices, we will use Lean and continuous ways of working using Disciplined Agile Methods This workshop is recommended for all team members new to Agile.
