

SAFe® 6.0 Product Owner / Product Manager

Duration: 2 days

Course Overview

Delivering Value through Effective Planning Interval Execution

What skills do you need to deliver value in an Agile enterprise? The SAFe® Product Owner and SAFe® Product Manager (POPM) course covers the tactical responsibilities of these roles in the Agile Release Train (ART). The course and resulting certification give you the guidance and tools to work effectively in remote environments with distributed teams.

Learn how product owners and product managers should work together to achieve the best possible customer and business outcomes. The SAFe POPM course will teach you how to adopt a customer-centric approach to building products, using the Scaled Agile Framework® to deliver more value, faster. Topics covered in this course include the daily role of POs and PMs; collaborating with engineering teams and business stakeholders; how to write epics, features, and stories; and how to design, prioritize, build, test, and deliver products with increased productivity and higher quality, leveraging AI tools and practices.

Who should attend?

The course is intended for anyone working as a product owner on an Agile team that is part of an Agile Release Train. Business Analysts working on Agile Teams can also benefit greatly from this course.

Prerequisites & pre-reading guidelines

There is no prerequisite course or certification. Pre-reading suggestions are issued in a welcoming email to those registered for a course.

How certification is earned

Certification is earned by attending the course and then taking an exam within 60 days after the course. Questions are multiple choice, single-select. There are 45 questions to be answered in 90 minutes and the passing score is 82%. If needed a first retake is covered by the fee once taken within the 60 day period. The full retake policy will be issued if and when needed.

Course Objectives

Attendees Learn:

- How to perform the role of a PO and a PM on a daily basis
- How to put the customer at the centre of your design, build, and test process
- How to prepare for and lead PI Planning
- How to decompose Epics to Features and Features to Stories
- How to collaborate with Agile teams to forecast work

SAFe® POPM answers the questions:

- How do POs and PMs plan and execute work during a PI?
- How do I integrate a customer-centric mindset to deliver products customers want?
- How do you connect SAFe Lean-Agile principles and values to the PO/PM roles?
- How do I use AI appropriately and responsibly?

Context

This course is designed for anyone who prepares stories for a team's backlog and collaborates with others doing so for teams on an Agile Release Train. This course also covers the basics of the Product Manager role (covered in detail in the Agile Product Management course). Customer focus and Backlog management are key elements of this course.

Related courses

While not a prerequisite, attendees may consider attending the SAFe for Teams course with their teams.

What's included:

- Course workbook and SAFe Studio access to help prepare you to take the certification exam, claim their digital badge, and tools to get started in your SAFe role
- One-year membership to SAFe® Studio with your first class attendance
 - Platform access to e-learning modules and curated members-only content to support your SAFe transformation
 - Member discussion forums to engage in ongoing conversations on the SAFe framework or how to better perform as part of an Agile Team
 - Curated content-playlists based on your interests and roles, including templated resources and facilitation guides to get you started
- Access to content, tools, and resources you need to practice SAFe every day
- SAFe® 6.0 Product Owner / Product Manager certification exam

Course Outline

Exploring Product Roles and Responsibilities

- Introducing SAFe for Product Roles
- The Lean-Agile Mindset
- Value Streams
- Responsibilities of Product Roles

Preparing for PI Planning

- PI Planning
- The Solution Vision
- Solutions and PI Roadmaps
- Customer-centric Features
- ART Backlog and Kanban

Leading PI Planning

- Communicate the vision
- Establish PI Objectives
- Manage dependencies
- Manage risks

Executing Iterations

- Stories and Story Maps
- Iteration Planning
- The Team Kanban and Team Sync
- Backlog refinement
- Iteration Review and Iteration Retrospective
- Continuous Delivery Pipelines

Executing the PI

- Aligning Delivery with Sync Events
- The System Demo
- The Innovation and Planning Iteration
- Inspect and Adapt

AI for Product Roles

- An Overview of AI
- Responsible AI
- Building an AI-augmented Workforce
